

...FOR A LASTING
LUSTER!

useit[®]-Superfinishing-Pad SG

JÖST
abrasives

A PERFECTLY EVEN FINISH

Smooth as glass – without changing pressure!

The *Superfinishing Pad* carries on where other abrasives reach their limit – giving you the desired effect every time. The multi-layered construction of the *Superfinishing Pad* evens out variations in the pressure applied and irregularities on the work surface and the abrasive plate.

Polishing, matt-finishing and refining almost any kind of surface is fast and simple – and the process results in a surface quality second to none. Dust inclusions and scratches can also be completely ground or polished out by means of full surface or targeted spot processing – without damaging the surface of the work piece.

This is sensational technology at its best – now lengthy grinding procedures are a thing of the past!

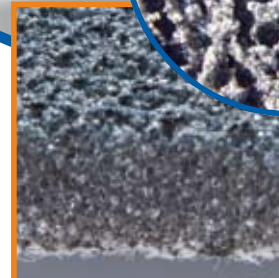

COARSE & FINE

Brilliant results - and dust-free!

The SG has a fine grinding net – but the new **useit®-Superfinishing-Pad SG2** has a grit carrier made of fabric. This more stable surface makes the *Superfinishing Pad SG2* ideal for final smoothing jobs, removing paint runs and dust inclusions, processing and smoothing orange peel skin, Smart-Repair jobs, leveling out border areas between differing surfaces, preparing vehicles for further processing and finishing stainless steel and nonferrous metals.

Both pads are ideal for wet and dry sanding.

When materials which produce a high concentration of dust have to be dry sanded, we recommend the *Superfinishing Pad SG* – the open structure of its grinding surface (the net) guarantees the continuous removal of dust through the pad.

Superfinishing Pads SG are available in the following grades:

Superpad SG

- 240
- 320
- 600
- 800
- 1200
- 1500

Superpad SG2

- 800
- 1600
- 1800
- 2000
- 2500
- 3000

Solid surface material

Acryl

Stainless Steel & NF metals

EFFECTIVE

Reduce your labor costs by up to 90%!

The perfect surface for every material, thanks to a new generation of unique, high-performance abrasives - the *SG and SG2 Superfinishing Pads*.

These pads offer the highest processing quality, even for the most demanding applications like ultra-sensitive surfaces and materials. Compared to traditional abrasives, the *Superfinishing Pad* will give you up to **6 times more performance** at the final polishing stage when used with a hand-operated sanding machine.

The pad's innovative and new open structure also enables you to work continuously in a dust-free environment - the dust is extracted over the entire surface.

The performance of our **useit-abrasives®** will totally convince you!

SHEER VERSATILITY

One pad - unlimited possibilities!

The special design and production technology of the *Superfinishing Pads* offers you globally unique processing of a vast range of materials. Mineral materials like, for example Corian®, Varicor®, Wilsonart®, GFK, paints, varnishes, acrylic glass and high gloss surfaces can be specifically sanded - in the shortest possible time and with a minimum of abrasive material use.

Even without paste, the *Superfinishing Pad* can create high gloss and matt surfaces on stainless steel and other metals – quickly and efficiently. The pads also open up a wealth of options for polishing and treating synthetic, laminate and parquet flooring smoothly and easily. In the automotive industry, the *Superfinishing Pad* is ideal for the Smart-Repair procedure and for removing paint runs, dust inclusions and overspray effects.

MADE-TO-MEASURE

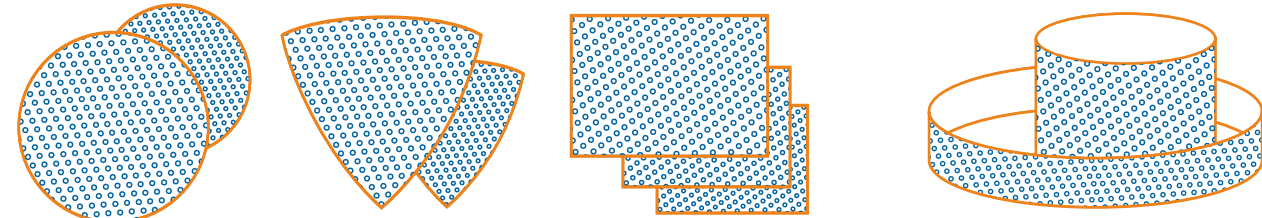

Reduce your warehousing costs!

Jöst abrasives designed and constructed the Superfinishing Pad to be used with all types of abrasive plates. A made-to-measure fit is guaranteed, in spite of different configurations and perforation combinations.

ADAPTABILITY PURE

suitable for all hole systems

Delivery just in time!

Whether you require discs, pads, drums, belts or brushes – the Superfinishing Pad is available in almost any shape and size and fits on all conventional sanders made by companies such as Bosch, AEG, Kress, Festo, Fein, Flex and many more.

Just ask us... we have the right solution, even for your specialized requirements - and that's a promise.
